

Changing Technology

Adoption for success

28th May 2021

Vilas Pujari, CIO, ACG

About ACG

- Indian MNC focused on manufacturing capsules, Pharma & packaging machinery, Films and Foils And Inspection Systems
- Factories around the world
- Focused on High quality products and delighted customers
- One step ahead in compliance than regulations and customer needs
- Helping customers to be compliant and grow
- One steps ahead in Technology Adoption
- Great Place to work for
- Well known for people practices

- Organizations and all operating functions have adopted technologies
- NewGen of professionals / Millennials entering workforce
- Internet is old Normal Now
- Mobiles are no more style statements
- Environment / sustainability / cost reduction
- And now the Pandemic

Technology adoption is no longer a choice
Make a choice to leverage technology for success

1. Integrity of Data
2. Security of Data
3. Repeatability / predictability of process
4. Readability of reports
5. Transparency of access control
6. “Informal” delegation of rights

We are generally not comfortable with

1. Digital signature
2. Reading Long and complex Digital Document
3. Digital document movement for approvals (Workflow)
4. e-mail approvals
5. Standard Reports
6. Big downloaded reports

Then how do we adopt Technology which is continuously changing

- Your Best Friend is CIO
- Don't Look at Data, Look at Logic, Then look at Data
- Understand system architecture, design
- Understand Data capture mechanism and checks and controls in Data Capture
- Differentiate between source and derived data

In new age “God is NOT in details”, “Technology is new god”

Remember the story of tree cutter with axe

Emerging Key Technologies

- Business Analytics
- Internet of Things
- Cloud
- ai
- Document readers
- Collaboration Tools
- AR / Hololens

And Many More

Thank You
